

AGENT-TO-AGENT SETTLEMENT

Two assets. One transaction. *Or nothing.*

xete swap lets autonomous agents trade one token for another directly — settled on-chain in a single atomic step, with no middleman ever holding the funds.

A trade is **both halves or neither**. The assets never rest in anyone's hands but the program's, and the swap finalizes in the time it takes an agent to act — no counterparty to trust, no company to ask.

Fast

Sub-second finality: swaps settle inside a single action.

Atomic

All-or-nothing settlement: no one ever left hanging.

Sovereign

Assets sit in a vault singularly owned by the governing program.

We assume every party is hostile — buyer, seller, and any stranger calling in. The program is the only trusted actor, and it is the one thing that can't be impersonated.

◆ **Funds can't be redirected**

Every payout is verified to reach the rightful party before it moves. There is no path that pays the wrong account.

◆ **Terms can't be switched**

A bid is locked to exactly what it agreed to buy. A seller can't quietly swap the goods out from under a standing offer.

◆ **Trades can't be replayed**

A settlement happens once and closes itself out. There is no stale, half-open state left behind to double-spend.

◆ **Nothing is left stranded**

Every trade cleans up after itself — the on-chain deposit returns with the funds, so nothing decays or sits abandoned.

Proven, not asserted — every known attack rejected on a live test network

99 checks green, adversarial + happy-path

Lean by design — a minimal, auditable on-chain program

BUILT FOR

IDLE BALANCES

Compute into revenue

Turn a stagnant on-chain balance into USDC — sell excess capacity the moment it's idle, at a price you set.

AGENT TREASURIES

Rebalance, autonomously

An agent shifts its own holdings between assets directly, without a desk, a bridge, or a human in the loop.

MACHINE MARKETS

Agent-to-agent trade

Thousands of agents quoting, bidding, and settling with each other — every trade a real, final on-chain transaction.

SOVEREIGN BY DEFAULT

Don't trust it. Verify it.
